Getting Answers Is Slow. Staying Informed Is Impossible.

1.8 hours per day.

More than 20% of every workday lost to searching, waiting, and piecing together information (McKinsey).

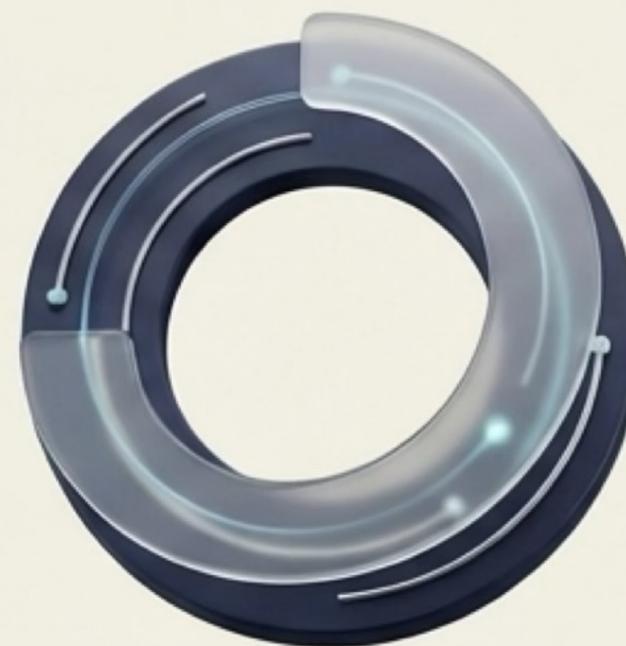

And the worst part: three days later you discover the project status changed, the contract was revised, the decision was made. **You were operating on stale information and didn't even know it.**

Ask + Pulse: One platform. Your data. Your device.

Ask: Get Answers in Minutes, Not Days

You ask a question. AI searches your data locally. If something is missing or stale, it identifies who can help and routes a query with your approval. **Minutes instead of days. AI-powered, human-verified.**

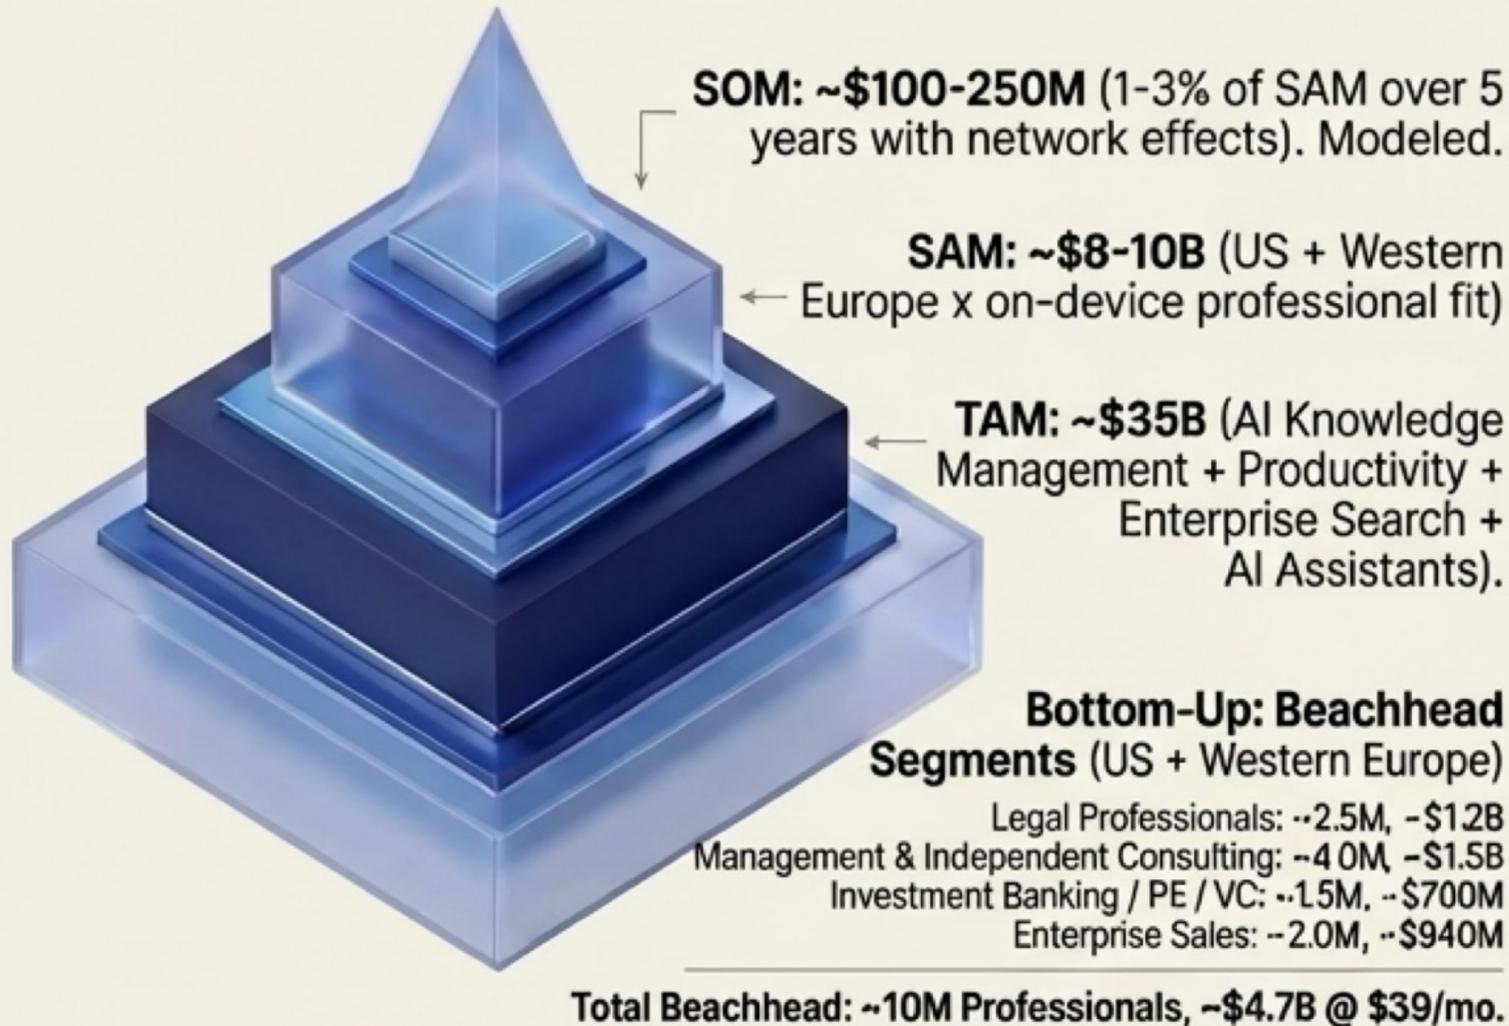

Pulse: Never Miss What Matters

"Watch" any topic and it becomes a persistent sensor. New emails and documents are continuously matched against your watches. AI-generated briefings tell you what **A Bloomberg Terminal for your professional life.**

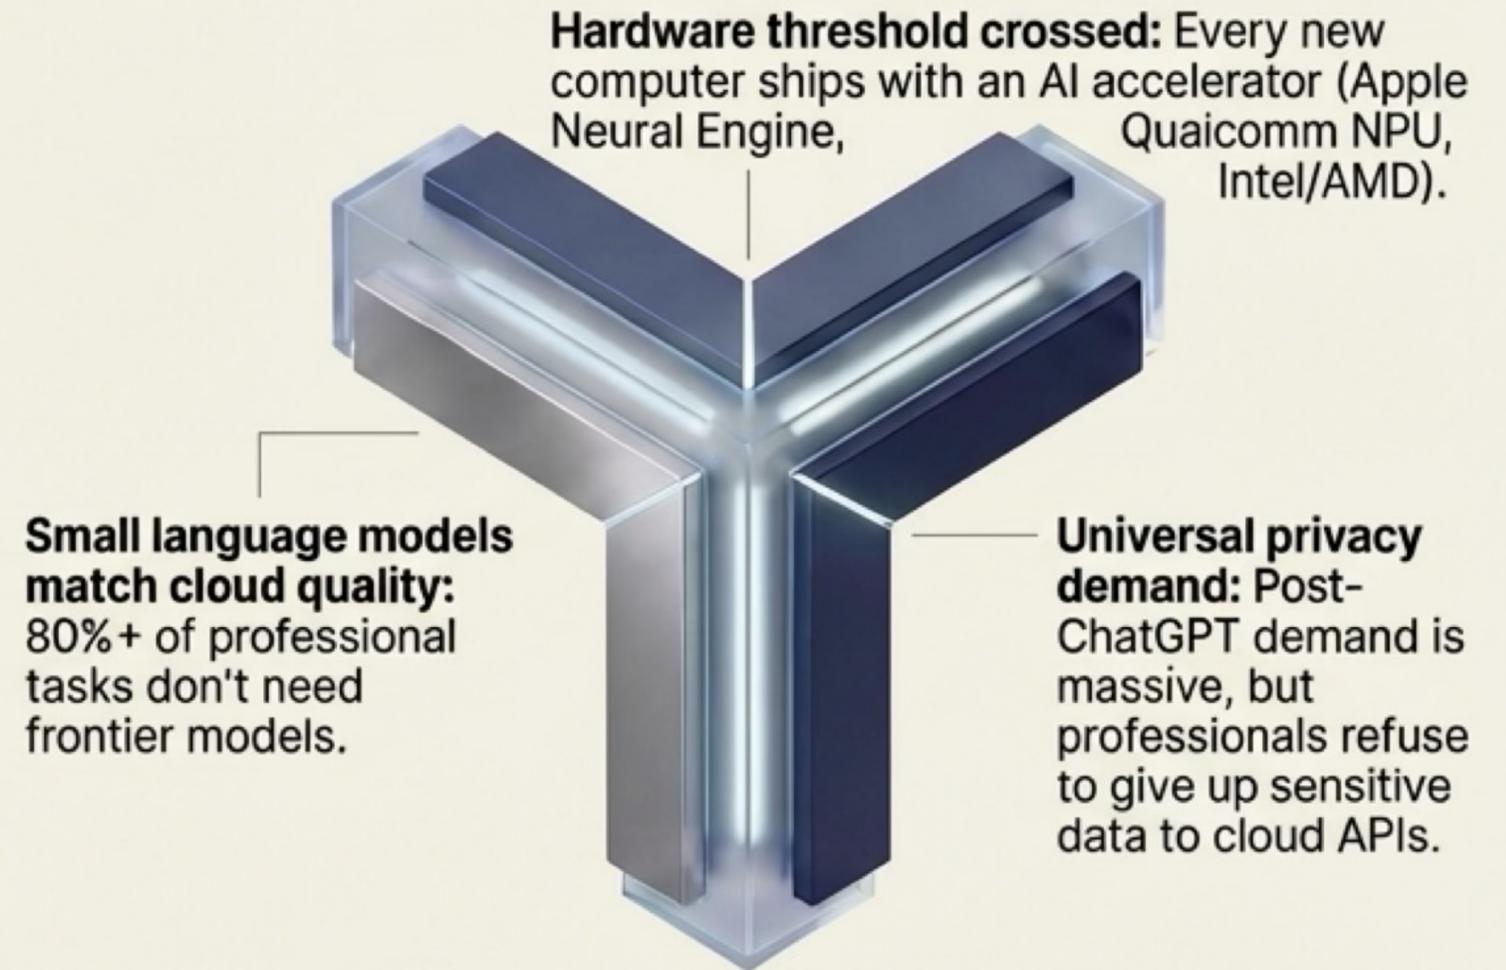

Ask gets you the answer now. Pulse makes sure you never miss what comes next.
All on your device. Data never leaves. No cloud upload. No usage fees. Patent pending.

Key Milestones

Virality & Network Effects

Built-in viral distribution.

Every query a user sends to a colleague is an organic, zero-cost acquisition touchpoint. The product is the distribution channel.

Network effects compound.

Useful from Day 1 for one user. Every additional user makes the intelligence richer. First to scale wins.
